

CODEPAINTER

C L I E N T / S E R V E R

revolution

**The most complete CASE TOOL
For Developing
Business/Commercial Applications**

CODEPAINTER runs on

- Windows 2000
- Windows NT
- Windows 98
- Windows 95

CODEPAINTER makes your applications
compatible with

- MS SQL Server 7.0
- Oracle 8
- IBM DB2
- Coming soon: Informix

CODEPAINTER generates source code in:

- Visual Fox Pro
- Visual Basic
- Coming soon: Java

CODEPAINTER frequently asked questions

Who is CodePainter for?

Software Houses developing Business/Commercial SW Applications.

What kind of applications can be build?

All kind of Business/Commercial applications: General Ledger, Inventory Control, Sales & Purchase Management, Production Management, etc.

Is programming knowledge required?

Very little knowledge is required: the applications are 'painted' using advanced graphical tools.

How can I generate the application without programming knowledge?

CodePainter automatically generates the entire source code in the defined programming language.

Do I need other tools to support my applications life cycle?

CodePainter supports all Software life cycle stages, starting from Analysis to Maintenance. Of course you need the license for the compiler of the generated source code to sell your application executable code.

What makes CodePainter different from other tools?

CodePainter is a powerful and user-friendly tool that includes both, RAD and C.A.S.E. functionalities: development is speeded up and the software plan is organized and managed properly.

How much time can be saved using CodePainter?

With both, RAD and CASE functionalities, software development can be made up to 10 times faster compared to standard programming languages.

In which languages is CodePainter available?

CodePainter default language is English and you can easily translate the generated application using the translation tool (included).

Are royalties owed for distribution?

No royalties are owed. You have 100% ownership on your applications!

Can Client/ Server applications be developed?

Yes, and CodePainter supports you on that

Can more programmers work on the same project?

Yes, that's what our customers do the most.

What about support?

English speaking specialized staff will support you.

CODEPAINTER attractions

CodePainter major attractions can be especially appreciated by Software Developers. CodePainter is extremely user-friendly and easy to use.

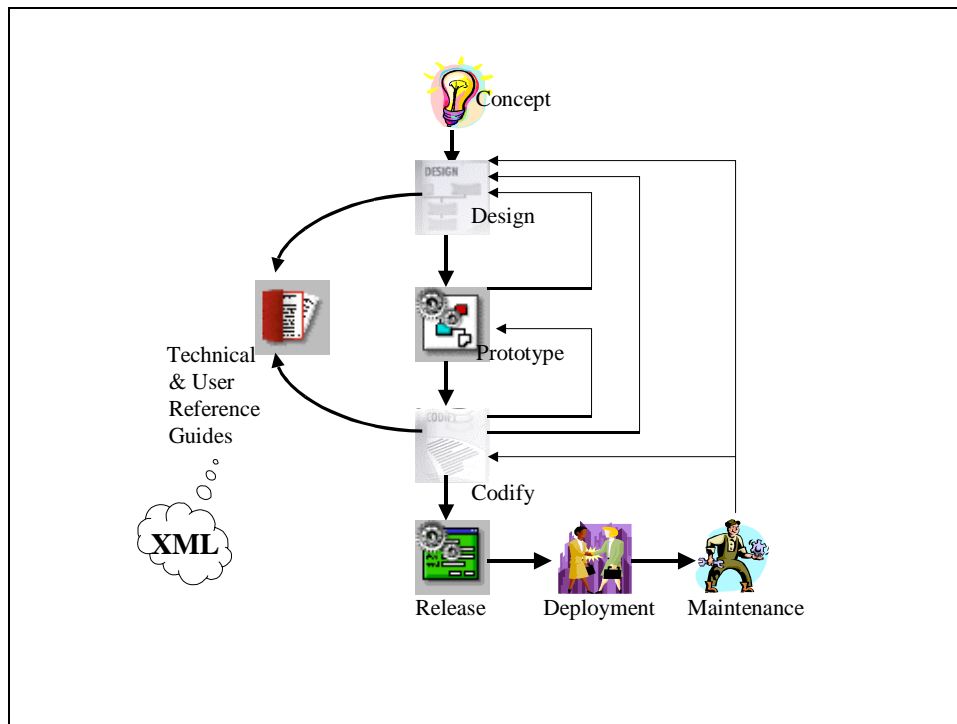

- ***Object-Oriented Domain Analysis for Business/Commercial Applications Development***
- ***Design through predefined Entities***
- ***Data definition independent from target Database Servers***
- ***Application source code: automatically generated in standard common programming languages***
- ***Cost Free Release: no royalties due***
- ***Maintenance fully supported by the tool***
- ***Application spoken language: customizable***
- ***User Reference & Technical Documentation: automatically generated***

CODEPAINTER's applications framework

With outstanding difference from other C.A.S.E. tools, CodePainter provides all generated applications with a framework where a set of utilities suitable to efficiently support business activities are made available. These utilities are useful for both programmers and End-Users, to customize their applications even further! The generated application and CodePainter deliver a unique development framework.

- **Client-Server transactional environment**
- **Security Control Tools**
- **Database Administration**
- **User & Group Administration**
- **Visual Query, Menu, & Zoom**
- **Instant Messaging, Post-In & Warnings**
- **On-line User Translations**

CODEPAINTER methodology

CODEPAINTER performances

- **Increase productivity**
 - Get the best of your programmers
 - Keep your projects under control
- **Save money**
 - No royalties
 - Minimize your time-to-market
 - Cut application maintenance costs
 - Reduce training costs
 - Increase learning curve
- **Maximize satisfaction of your customers**
 - Match customer requirements: on time, on budget & on target
 - Easy End User customizations in terms of Query, Menu, Zoom & Report
